

NES Funding Status Syncing

NES Status Sync Utility

This utility updates statuses of the patient from NES to Indici local database on a monthly basis.

Patient Enrolment and Newborn Preliminary Enrolment

On successful enrolment or Newborn Preliminary Enrolment, the system will automatically set Funding from date to “1st of the next month” and Funding To date to “end of Month of NES Expiry Date”.

Re-Enrolment Functionality

On successful re-enrolment of patient, system will retain Funding from date to its previous enrolment from date and Funding To date will be updated to “end of Month of NES Expiry Date”.

End Enrolment Functionality

When practice ends an enrolment, system will unenroll the patient and Funding To date will be set to end of the current month; Funding From date will be unchanged.

Enrolment Transferred Notification

When Enrolment Transferred notification will be received from NES against any Patient. The system will mark that patient as “Enrolled Else Where” and set Funding To date to End of Month in which enrolment has been transferred.

Enrolment Expiry Notification

When Enrolment Transferred notification will be received from NES against any Patient. The system will mark that patient as “Enrolled Else Where” and set Funding To date to End of Month in which enrolment has been transferred.

Patient Deceased Notification

When Patient’s Deceased notification will be received from NES against any Patient. The system will mark that patient as “Deceased” and will set Funding To date to End of Month in which deceased notification has been received.

Patient Linked Notification

When Patient’s NHI Linked notification will be received from NES against any NHI, the system will mark the dormant NHI as “Casual” and will set Funding To date to End of Month in which notification was received. The patient's enrolment status will not be changed, the Practice will review and set the status manually.
