Profile for Mac - changing ethnicity

Each view of the Patient Register is used to enter or find a specific category of patient details, such as:

- General Contact details, date of birth, patient status, PHN. In this view, it is also possible to denote a patient's preferred phone number and email address.
- Financial a summary of patient's account
- > Practice a quick reference to patient's usual provider and first/last seen date
- Family information about next of kin, other family members, guarantor, care giver etc.
- ➤ Maternity active only for female patients, pregnancy record if applicable
- Personal Occupational details, photograph

To add information an existing patient's record, open Patient Registry window:

- 1. Click Alter Patient in the toolbar, or
- 2. Select Patient/Alter Patient from the menu bar.
- Select patient if necessary (see Introduction for more details on how to select patient's record).
- 4. The selected patient record will open, allowing you to alter any details:

If a patient has identified their ethnicity as Maori and New Zealand European – Maori must always be Ethnicity 1
